

## **Don't be Deceived from fake Solar Net-Metering Companies**

1. Company must be licensed from Alternative Energy Development Board (AEDB), otherwise the company is fake. Check its license and registration on (<https://www.aedb.org/list-of-aedb-certified-vendors-installers-service-providers-for-on-grid-off-grid-and-hybrid-installations>) in V1, V2 and V3 categories.
2. The installation company must have the experience of solar installations and registered with SECP, FBR, PEC and Chamber of Commerce to avoid any loss and fraud.
3. Installer company must have its own offices and after sales and service mechanism.
4. The solar panels should be from Tier-1 Companies, preferably from top 10 e.g. Longi Solar, Jinko solar, Canadian Solar etc. Ask for the original import documents from the installer of solar panels to avoid the installation with used or refurbished solar panels.
5. On Grid and Hybrid solar inverters must be backed by five years warranty from a reputable after sales and service providing company. The trouble-free On-Grid inverters in Pakistan are Solis, Goodwe, Growatt, Huawei, Chint and Sofar.
6. Similarly, the cable should be 99% pure of copper and made by Pakistan cables, Fast Cables, Newage Cables, Quality Cables etc.
7. The installer must do proper DC earthing with copper rods and the circuit breakers from the well reputed companies like Siemens, Terasaki, Schneider etc.
